

Employee / Job Description

We are seeking a Mechanical Engineer for our dynamic mechanical, electrical, and plumbing engineering firm where the atmosphere is high-energy, positive and motivational. We recognize people as our most valuable asset. Each member of our firm must be a team player and exhibit integrity. This is an environment where you will be accountable for your work and respected for it. Proactive, self-motivated individuals will find a good fit here.

We provide mechanical, electrical and plumbing engineering and lighting design services for a variety of clients. Our work includes projects in healthcare, airports, municipal facilities, K-12 and higher education facilities, hotel, fire/police stations, churches, parks, roadway, restaurants, office tenant finish, retail tenant finish, as well as core and shell design.

Required Qualifications:

- Mechanical Engineering or Architectural Engineering degree
- Passed FE Exam (you will be expected to take and pass the PE exam when you become eligible)
- 1 – 5 Years experience in design of mechanical/plumbing systems for commercial construction is required
- Ability to design HVAC air distribution, hydronic heating/cooling, and plumbing systems
- AutoCAD drafting experience desired
- Ability to manage multiple projects at various stages of design and construction
- Effective verbal and written communication skills
- Effective technical writing skills

Our competitive salary and benefits package includes:

- Paid vacation, sick leave, and holidays
- 100% paid medical insurance for employee with 50% paid for dependants
- 100% paid dental insurance for employee with 50% paid for dependants
- Employee paid pre-tax AFLAC supplemental insurance available
- Employee SIMPLE IRA plan available with company match

Please submit resume, three references, and transcripts (for recent college graduates), to Paula at Paula@ssgroupinc.com or by fax to 303.696.0812.
